

Program Administrator (PA) and Program ID¹	National Fuel Gas Distribution Corporation		
Program Name	Residential Rebates	LIURP	Small Non Residential Rebates
Program Type²	Appliance Rebates	Low Income Usage Reduction	Small Non Residential Rebates
Total Acquired First-Year Impacts This Month³			
Net first-year annual kWh acquired this month ⁴			
Monthly Net kWh Goal (based on net first-year annual ⁵ kWh Goal)			
Percent of Monthly Net kWh Goal Acquired			
Net Peak ⁶ kW acquired this month			
Monthly Net Peak kW Goal			
Percent of Monthly Peak kW Goal Acquired			
Net First-year annual therms acquired this month	132,128	25,330	24,591
Monthly Net Therm Goal	NA	NA	NA
Percent of Monthly Therm Goal Acquired	NA	NA	NA
Net Lifecycle kWh acquired this month			
Net Lifecycle therms acquired this month	2,217,463	633,261	418,054
Total Acquired Net First-Year Impacts To Date			
Net first-year annual kWh acquired to date			
Net first-year annual kWh acquired to date as a percent of annual goal			
Net first-year annual kWh acquired to date as a percent of 8-year goal			
Net cumulative kWh acquired to date			
Net utility peak kW reductions acquired to date			
Net utility peak kW reductions acquired to date as a percent of utility annual goal			
Net utility peak kW reductions acquired to date as a percent of 8-year goal			
Net NYISO peak kW reductions acquired to date			
Net first-year annual therms acquired to date	6,045,085	979,263	936,229
Net first-year annual therms acquired to date as a percent of annual goal	NA	NA	NA
Net first-year annual therms acquired to date as a percent of 8-year goal	NA	NA	NA
Net cumulative therms acquired to date	101,452,826	24,481,586	15,915,900
Total Acquired Lifecycle Impacts To Date⁷			
Net Lifecycle kWh acquired to date			
Net Lifecycle therms acquired to date	101,452,826	24,481,586	15,915,900
Committed⁷ Impacts (not yet acquired) This Month			
Net First-year annual kWh committed this month			
Net Lifecycle kWh committed this month			
Net Utility Peak kW committed this month			
Net first-year annual therms committed this month	0	0	0
Net Lifecycle therms committed this month	0	0	0
Funds committed at this point in time	0	0	0
Overall Impacts (Acquired & Committed)			
Net first-year annual kWh acquired & committed this month			
Net utility peak kW acquired & committed this month			
Net First-year annual therms acquired & committed this month	6,045,085	979,263	936,229
Costs⁸			
Total program budget	\$ 4,022,908	\$ 3,040,000	\$ 1,747,092
General Administration	\$ 100,000	\$ 427,000	\$ 136,800
Program Planning			
Program Marketing	\$ 522,908	\$ -	\$ 227,092
Trade Ally Training			
Incentives and Services	\$ -	\$ -	\$ -
Direct Program Implementation	\$ 3,400,000	\$ 2,613,000	\$ 1,383,200
Program Evaluation			
Total expenditures to date	\$ 252,857	\$ 106,969	\$ 12,536
Percent of total budget spent to date	6.3%	3.5%	0.7%

Number of processed applications <i>approved</i> to date ¹⁰	56,883	1,817	972
Percent of applications received to date that have been processed	NA	NA	NA

NOTES:

¹DPS Staff needs to work with utilities to develop a Program ID naming convention. However, a Program ID number is not required for the first report. Note that when developing program ID naming conventions, utilities would like to minimize computer programming/reporting costs that they might incur if the proposed naming conventions are complex or the utility's current naming conventions require modification to Staff's proposed format.

²There is not currently a consistent list of program types but individual categories for common use by administrators could be developed.

³First-year savings are defined as the annual savings expected from a given measure in the first year after installation. The annual savings are sometimes the result of annualizing estimated savings that are based on data that cover less than one year. *Acquired* kWh savings are defined as those savings that reported by the program administrator in program tracking databases and for which a rebate check has been sent to the participant on a specific date.

⁴Regardless of the month in which a measure is installed within a given calendar year, the program is credited with the associated savings for the entire year.

⁵Program Administrators should make best estimate of the annual goal even though the goal might in some cases cover two calendar years. Also, Staff wants administrators to try to be as accurate as possible in determining the *monthly* goals but does not want to mandate monthly goals, at least initially.

⁶Peak is defined uniquely for each utility.

⁷The lifecycle savings are tracked beginning in the *year* in which a given measure was installed. Over the period 2008-2015, PA's must take into account the fact that savings from measures installed early in the period will vanish at the end of their useful life before the end of 2015. Thus, the lifecycle impacts acquired to date will be different for each month as a function of adding savings from measures installed in a given month and subtracting savings from measures installed earlier in the funding cycle that have reached the end of their useful life.

⁸Committed savings are defined as those for which funds have been encumbered by not yet spent. When the funds are spent (i.e., a rebate check has been sent to the participant on a specific date), the savings are then considered "acquired." Staff would like to see the program administrator's best *estimate* of what they have committed. There should be some assumptions on how the administrator does that. Program administrators should forecast as accurately as possible and it should get more precise with program experience, e.g., the difference between achieved and committed should get closer over time.

⁹These are the budget categories to be used by companies when submitting the required energy efficiency program implementation plans. In its January 16, 2009 Order, the Commission directed Staff to provide definitions for the budget categories to be used in the preparation of these plans (See Order Approving "Fast Track" Utility-Administered Electric Energy Efficiency Program With Modification, at page 11). These categories are provided to promote consistency in budget construction and reporting among the utility plans.

¹⁰An application is processed once the PA has reviewed the application and made a decision whether to approve the incentive payment to the customer. Once the decision has been made to pay the incentive to the customer, these funds and their associated energy and demand impacts become "Committed."

¹¹The application is approved once the decision has been made to pay the incentive to the customer. Note that these funds and their associated energy and demand impacts become "Committed" once this decision is made. Also note that for programs in which there are cases in which an application could be received, processed, and approved all in one day, then a "1" would be counted for each step in the tracking lifecycle.
